

Individual is not signed in:

- + Sees all public snippets and the associated comments on the snippets
- + Can search snippets
- + Can see tags of snippets

Individual needs to sign in via Google or Github:

- + To add a snippet
- + To comment on a snippet

Zoom in of a snippet:

- + Each snippet has a clearly visible date
- + There is a flag on each snippet, so others can let us know that the snippet is outdated - must be signed in. When someone clicks flag as outdated a Github Issue is created and individual submits a request. Then on the home page others can contribute by submitting updates.
- + Each snippet says what version of everything that is used
- + Each snippet allows people to comment, so long as they are signed in
- + Each comment can get an up vote (no down votes at the moment?) - if someone is signed in
